

Repair Services Designed to Recover Profits

REPAIR AND REFURBISHMENT

Reconext views repair and refurbishment as investments used to increase the value of a device. The ultimate objective is expanding your profit margins by selectively employing the services that lead to the greatest uplift in value net of the associated repair cost.

We continually strive to drive down our costs through exhaustive parts reclamation, automation of processes and using data-driven decision making.

Reconext is vertically integrated to host all required services within our global footprint. From parts sourcing to OEM parts inspection to LCD recovery, our highly-trained associates have the expertise to quickly turn your used device into a near new functional device.

Our solutions can be custom tailored to fit your budget and your customer cosmetic standards. Our multi-faceted solutions are available to be mixed and matched to design the optimal value recovery program.
