

Finding Fortune in Failure

RECOVERY SERVICES FOR DEVICES FAILING DATA ERASURE

A range of issues can prevent a device from being properly data wiped. Reconext has developed a suite of cost-effective repair operations that can address many underlying issues in up to 75% of devices. These services provide a compelling return on investment and help minimize potential risk from customer data exposure.

"We've found Reconext's data erasure services to be extremely valuable in recovering devices which previously failed an initial data sanitization attempt. An unrelenting focus on overall data security is of critical importance to us."

**Supply Chain Leadership
Tier-One U.S. Carrier**

Recovery of units failing data erasure is one component of our comprehensive array of repair and refurbishment services. Reconext can provide a **single source solution** that reduces costs, creates efficiency, and maximizes the value of your used devices.
