

# Services for Every Stage of the Mobile Device Lifecycle

## MOBILE LIFECYCLE SERVICES

Mobile asset owners require a specialized and integrated set of services that address the complexities of the complete mobile life cycle. Our comprehensive solutions address the circular nature of product flows with forward and reverse logistics receiving equal focus.

Returns can arrive in all shapes, sizes and conditions. Reconext can quickly and efficiently manage inbound receipt, inspection and grading, cleaning and refurbishment, repackaging, aftermarket sales and warranty management. Our global footprint ensures your devices are quickly returned to your supply chain, maximizing their value.

Forward fulfillment can offer its own unique complexities through multiple channels, global markets and specialized requirements. With extensive value-added services – kitting, device customization, labeling, laser etching and robust quality controls— your customers will receive products which exceed their expectations.

## Reverse Logistics

- Returns management
- Inspection and grading
- Repair and refurbishment
- Repackaging
- Warranty management
- Aftermarket sales

## Forward Logistics

- Order fulfillment
- Kitting & specialization
- Order customization
- Transportation management
- ASN/EDF file management
- Parts management
