

A Single Portal Solution for Used Mobile Phones, Tablets, Laptops, Desktops, and Smart Watches

CORPORATE VALUE RECOVERY

Changes in technology and personnel require every large corporation to regularly dispose of IT equipment efficiently and in full compliance with data protection and environmental regulations. Often doing so with multiple disposition partners, IT Asset Managers find it difficult to keep track, leaving them exposed to serious risks and unable to reconcile with the appropriate ledger or budget.

As more companies are committing themselves to a circular economy or better environmental practices, what happens to these products, and maximizing the value recovery from them, becomes more critical than just “discarding it to the highest bidder”.

Reconext works directly with businesses to instantly recover the most value from their used equipment in a secure and environmentally friendly manner on a global scale. Our customers get access to Corporate Renew, a platform to simplify and manage their entire take-back experience, all presented in a convenient dashboard.

To learn how a buyback program can benefit your organization, email tellmemore@reconext.com.

Global

With our global network of sites, we can deliver innovative solutions in one or multiple locations in the Americas, Europe, and Asia Pacific.

Convenient

- A user-friendly customizable web-based tool: No license fee, real-time reporting, device tracking, automated shipment label
- Very few return conditions
- Solution applicable to a wide range of workplace electronic equipment

Secure and Compliant Chain of Custody

Using the latest data erasure tools, Reconext ensures the removal of all personal data and corporate IT configuration from each device. We provide serialized tracking and reporting of erasure.

Better for the environment

- On-demand reporting on the environmental impact of recovery activities
- Access to unique Reconext IP processes prioritizing device reuse whenever possible
- “End-of-life” devices handled in accordance with our R2 or WEEELABEX certifications

Better financial returns

Our flexible financial models can include revenue share. Coupled with higher recovery yield, this means full alignment of incentives between what is good for you, for us and for the community.
